Store at -20°C. For long term storage, aliquot and freeze at -70°C. Avoid repeated freeze/defrost cycles.

**BACKGROUND:**  
Cell adhesion molecules (CAMs) are a family of closely related cell surface glycoproteins involved in cell-cell interactions during growth and are thought to play an important role in embryogenesis and development. The family contains NCAM (for neuronal cell adhesion molecule), ICAM (for intercellular adhesion molecule), VCAM (vascular cell adhesion molecule), PECAM-1 (platelet/endothelial cell adhesion molecule-1), etc. ICAM-2 is involved in lymphocyte recirculation by blocking LFA-1-dependent cell adhesion.

**APPLICATION:**  
The antibody can be used in Western blotting (0.5-4 µg/ml). It detects multiple isoforms of ICAM-2. However, the optimal concentrations should be determined individually. Blocking peptide (Cat.# 3926BP-50) is available separately.

**Cat. #: 3926-100**  
Western blot analysis of ICAM-2 in lysates from Jurkat cells (Lane 1 & 2) and 3T3 cells (Lane 3).
