

# Certificate of Analysis

**Product Name:** MagSeq mRNA Purification Kit

**Cat:** K2012008

**Lot:** B506052

**Shipping Condition:** Room Temperature

**Storage Condition:** 4°C

**Shelf Life:** 1 year from the date of receipt under proper storage conditions.

## **Description**

MagSeq mRNA Purification Kit contains reagents, including oligo (dT) magnetic beads, which is enough for 8 mRNA isolation. The kit's set up is perfectly compatible with next generation sequencing instrument, such as Illumina's HySeq, using Flow Cells with 8 channels.

## **Quality Control**

The quality and purity of isolated mRNAs were tested by spectrophotometer. A<sub>260/280</sub> is between 1.8 and 2.0 (detected in 10 mM Tris-Cl, pH 7.5).

## **Kit Components**

1. One MagSeq mRNA Purification Kit
2. Certificate of Analysis
3. One User Manual

**FOR IN VITRO RESEARCH USE ONLY**

**APPROVED BY:** \_\_\_\_\_
