• Rabbit Anti-RIP5/RIPK5 Polyclonal Antibody

Primary Antibodies

Background:

The RIPK5 gene encodes a dual serine/threonine and tyrosine protein kinase that is expressed in multiple tissues. Multiple alternatively spliced transcript variants have been found, but the biological validity of some variants has not been determined.

Source/Purification:

KLH conjugated synthetic peptide derived from human RIP5/RIPK5 (556-595aa). Was purified by Protein A and peptide affinity chromatography.

Storage: Prepared as lyophilized powder or liquid and shipped on ice. Store at -20°C for one year.

Reconstitution:

If the antibody is in liquid form, no reconstitution needed.

Reconstitution is only required for the lyophilized antibody. Please refer to the reconstitution instruction card in the package.
